

# Shamima Yesmin

## Web Developer

Dhaka, Bangladesh

[Email](#), [GitHub](#), [Linkedin](#), [Portfolio](#)

## Summary

---

Junior web developer with no experience and seeking an opportunity to extend my web development knowledge. My extensive experience with developing websites using JavaScript, React js, Firebase, Node js, and MongoDB.

## Skills

---

**Expertise:** HTML5, CSS, Bootstrap, JavaScript, React Js, Node Js, TailwindCss, React Bootstrap, React Query, Firebase, ES6, React Router

**Comfortable:** Express Js, MongoDB, Jwt

**Familiar:** TypeScript, Next Js, MaterialUi, Redux.

**Tools:** VS code, Github, Netlify, Figma, Chrome Dev Tools, vercel

## Projects

---

### 1. Used Car Shop (Used product resale website)- [Live link](#) - [Github Client](#) - [Github Server](#)

- It is a used car resale website. Users can sell and buy the product by paying on stripe.
- There are multiple user roles such as admin, seller, and buyer route. Admin can control seller and buyer roles. Sellers can add products for sale. Buyers can buy products or delete products.
- The website has a user authentication system.

**Technologies used:** React js, React router, Node js, TailwindCss, Firebase, MambaUI, MongoDB, JWT

### 2. Carpenter Service (Service review website) - [Live Link](#) - [Github Client](#) - [Github Server](#)

- Created online service and also implemented a user review section to add reviews
- Every service has a details page where users can add reviews and see others' reviews on the page
- Added user Authentication, delete services, delete a review, edit review and order the service.

**Technologies:** React js, React router, Node js, TailwindCss, Firebase, MambaUI, MongoDB

### 3. Edumate (Online course website) - [Live Link](#) - [Github Client](#) - [Github server](#)

- Designed and implemented online free course with course details page and each course pdf.
- The user can see the course description and get a premium course in the checkout page route.
- The user can purchase the course. Authentication implemented for good user experience

**Technologies:** React js, Firebase, React router, MongoDB, TailwindCSS, DaisyUi, Node js, JWT
